

# Holly Park Pharmacy

## EXPANDING TREATMENT OPTIONS

We can expand your treatment armamentarium by custom making medications that are:

- Easy to use
- Hypoallergenic
- No longer available due to discontinuation or shortage

## COMPOUNDING - SAFE & LEGAL

Our compounding pharmacy must comply with the regulations set forth by the State Board of Pharmacy. The State Board of Pharmacy sets and enforces regulations for compounding, just as it does for traditional pharmacy. The ingredients used by our pharmacy to make compounds come from FDA-registered and inspected facilities.

*“Compounding allows a medication to be customized to meet an individual patient’s need; allowing us to help you meet your most challenging medication cases.”*

## Helping Physicians and Patients to Achieve Positive Therapeutic Outcomes

We are dedicated to formulating creative, individualized, compounded medications that can improve compliance, maximize the potential for therapeutic success, and reduce the overall cost of pharmaceutical care.

## A Unique Pharmacy with Unique Skills

Preparation of these specialized products requires chemicals and equipment that are not available in most pharmacies. Our pharmacists have received extensive training in compounding techniques and have access to a support network that generates a constant exchange of ideas and innovations.

## PERSONALIZED CARE

Our highly trained pharmacists have the ability custom make certain medications in our state of the art compounding laboratory. This process is called "prescription compounding". Compounding medications allows for:

- **Unique delivery vehicles to be utilized** (topical creams, oral suspensions, etc.). These unique forms of delivery may make administering medications easier, more pleasant, and potentially more effective.
- **Medicines to be concentrated based on individual need**; which maximizes therapeutic outcomes while potentially reducing side effects.
- **Multiple medications to be combined to form a customized medication**. This may speed the healing process and save patients valuable time and money, eliminating the need of switching from one therapy to the next.

# HOLLY PARK PHARMACY

Our compounding laboratory is a state-of-the-art facility, equipped with today's most modern technology. This ensures that each compound we prepare meets the stringent guidelines set forth by the US Pharmacopeia (USP).

## COMPOUNDING FOR COMMON PAINFUL CONDITIONS

We have the ability to formulate and dispense medications that treat the following painful conditions:

- Complex Regional Pain
- Back Pain
- Neuropathic Pain
- Breakthrough Pain
- Joint Pain
- Cancer Pain
- Wound Pain
- Muscle Soreness
- Arthritis Pain
- Chronic Pain
- Fibromyalgia Pain
- Neuralgia Pain
- Post-Op Pain
- And Many Others!

## CUSTOM DOSING FORMS

We can compound medications in the following forms:

- Transdermal Gels
- Suppositories
- Troches/Lozenges
- Wound Treatments
- Chewables/Capsules
- Transdermal Creams
- Topical Sprays
- Topical Ointments
- Sublingual Drops
- Flavored Oral Suspensions

And More!

## PHYSICIAN BENEFITS

- **Increase your Treatment Armamentarium**, and develop a highly satisfied patient base.
- **Distinguish your medical practice from that of other providers** in your field of medicine, and grow your practice
- **Be assured of competitive, affordable prices** that make treatment possible and practical for you and your patients.

## HOW TO PRESCRIBE

1. **Make sure to indicate that the medication is to be compounded.** You can do this by writing "Compounded Medication" or "Medication to be Compounded" on the Rx.
2. Indicate the **name of the medication and the concentration.**
3. Indicate the **delivery form.**
4. Indicate the **quantity.**
5. Indicate the **dosing directions.**

Our compounding pharmacists are happy to consult with you regarding ways to personalize medications for all of your patients - man, woman, and child.
